SUMMARY

Frontend Developer (React.js specialist) with 2+ years of experience building user-centric, high-performance web interfaces, now expanding into full-stack development (Node.js, Express, MongoDB) and AI integration. Skilled in JavaScript, React, REST APIs, and responsive design, with hands-on experience shipping and deploying production applications end to end. Currently pursuing an MS in Information Technology.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), HTML5, CSS3
- **Frontend:** React.js, React Hooks, Context API, React Router, Bootstrap, Responsive Web Design, SPAs, State management, Component-based architecture
- **Backend & Full-Stack:** Node.js, Express, MongoDB (Mongoose), REST APIs, JWT authentication, bcrypt, Role-based access control
- **AI:** Google Gemini / LLM API integration, structured outputs, prompt design
- **Tools & Deployment:** Git, GitHub, VS Code, Vercel, Render
- **Web Concepts:** Axios, CRUD operations, Cross-browser compatibility, Performance optimization, UI/UX collaboration

EDUCATION

Washington University of Science and Technology — MS in Information Technology

*Expected
2023 | CGPA: 7.5*

Gujarat Technological University — B.E. in Computer Engineering

PROFESSIONAL EXPERIENCE

Software Developer (Frontend) — iCliQ Solution, Ahmedabad, India

May 2023 – July 2024

- Developed and maintained responsive web applications using HTML, CSS, JavaScript, Bootstrap, and React.js for multiple client projects.
- Optimized JavaScript and CSS to improve page-load performance and UI responsiveness across devices.
- Built reusable, modular React components to standardize UI patterns and reduce code duplication.
- Used Git and GitHub for version control, collaborating with designers and backend developers to ship features on time.

Software Developer (Frontend) — Hornbook Technologies Pvt. Ltd., Ahmedabad, India

Feb 2022 – May 2023

- Developed responsive, mobile-friendly web applications with HTML, CSS, Bootstrap, JavaScript, and React.js, ensuring cross-browser compatibility.
- Designed and implemented reusable UI components, improving code maintainability and development speed.

PROJECTS

JobMate — Full-Stack AI Job Marketplace

[Live](#) | [Code](#)

- Built and deployed a full-stack, 3-role job marketplace (job seeker, recruiter, admin) using React, Node.js/Express, and MongoDB; hosted live on Vercel and Render.
- Implemented secure JWT authentication, bcrypt password hashing, and role-based access control with resource-ownership checks across all APIs.
- Integrated Google Gemini AI for resume-job match scoring, cover-letter and job-description generation, and a career chatbot.
- Engineered the end-to-end hiring loop — recruiters post and manage jobs, seekers apply and track applications, admins oversee the platform.

HealthKeeper — Appointment Scheduling System

- Developed a scheduling interface for patient-doctor interactions with real-time form validation and a modular, component-based structure.

ExpenseTracker — Personal Finance Manager

- Built a finance tool with automated income/expense categorization, data visualization, and local persistence for a reliable, mobile-ready experience.
